

VELUX
ROOF WINDOWS & SKYLIGHTS

Passive Light Gaining Ground in Green Building

Easily installed, inexpensive tubular skylights are a good source

Passive light is defined as light without the heat emitted by electrical sources. It's a form of natural light, but in this age of green building it has acquired an upscale name. No matter what it's called, it's still one of the best lighting methods available. It's free. It's effective. It's efficient.

And it's easy to bring into homes through tubular skylights without flipping an electrical switch, especially to smaller interior areas that don't normally get a lot of natural light, including hallways, laundry rooms, closets or windowless bathrooms.

According to Tim Johnson, product manager with Velux America, Suntunnel™ skylights can bring passive natural light to areas where traditional skylights aren't needed or won't fit, while admitting very little of the heat that windows and other light sources produce.

They capture light very efficiently through a clear, weatherproof dome on the roof. The light travels into the home through highly reflective tubing, ending at a diffuser in the ceiling that looks like a traditional in-ceiling light fixture.

The units offer a choice of highly reflective rigid tubing between the roof and ceiling or flexible tubing to easily bypass HVAC equipment or other obstructions in the attic. They are less expensive than many traditional skylights and easier to install.

Radio Listenership-Where Do You Fit In?

In today's marketplace, the consumer has many more choices as to how they access news and music on the radio. At Dunn® Lumber, we're aware of that fact but at the same time want to make sure we are keeping in touch with as many of our customers as possible when we choose traditional radio stations to air our commercial messages. We'd like your help so we can make an informed decision when purchasing radio.

For those of you that are willing to help us achieve this, please take a moment to fill out the survey below and mail

it to our corporate office. We know we are asking you to take time out of your busy schedule to give us this feedback, so instead of another tee-shirt, picnic blanket or travel coffee mug, we

thought we better put more "skin" in the game. We will enter all those who respond to the survey into a drawing where you could win your choice of a **\$500 Dunn Lumber Gift Card** or **15,000 Miles from Alaska Airlines** (you must have a valid Alaska Airlines Mileage

Plan account to receive miles.) ■

Passive light - From front page

The easy-to-install Sun Tunnel skylights are available in a variety of models in 10, 14 and 22 inch diameters for different spaces and lighting needs.

The installation process is very straight-forward, Johnson says, with many components pre-assembled right out of the box. A professional installation usually takes just two or three hours.

And now is a particularly good time to consider upgrading existing skylights or adding new units to qualify for a tax credit of up to \$200.00 under the Energy Tax Incentives Act of 2005. Details are available at www.energy.gov/taxbreaks.htm. For information on skylight selection and the benefits of natural light, call 1-800-283-2831 or visit www.veluxusa.com. For government information on window and skylight energy efficiency visit www.energystar.gov, and for independent agency information visit www.nfrc.org or www.efficientwindows.org.

Visit any Dunn Lumber location to see a Sun Tunnel display or pick up a stock unit. Optional light kits are available that install inside the tunnels for nighttime use. ■

Enter the Ultimate Tradesman Challenge

NASCAR Nextel Cup driver Jamie McMurray, of the #26 Irwin Industrial Tools Roush Fenway Racing team, is joining forces with Irwin Industrial Tools to conduct a nationwide search for America's top tradesman. Dunn Lumber has joined the team to bring the Ultimate Tradesman Challenge to customer appreciation barbecues at three Dunn Lumber locations this summer.

Contestants will be asked to measure, mark and drill a piece of wood, using Irwin tools, as quickly and accurately as possible. Each entrant will be timed and the final piece will be judged for accuracy on the spot.

Contestants with the 30 fastest times in the local market challenges will advance to regional events. The three regional finalists will then compete against each other for the title of "Ultimate Tradesman" on November 11 during the Phoenix race weekend and the ultimate tradesman will be given a chance to win \$1.26 million.

Local challenge event winners will receive race tickets to their local NASCAR race and Irwin apparel and merchandise. Regional challenge winners will receive a \$10,000 cash prize, race tickets, an Irwin racing jacket

and an Irwin tool bag filled with professional grade product.

Dunn Lumber customer barbecues and Ultimate Tradesman Challenge events will be held on June 6 at Lynnwood, June 12 at Normandy Park and June 20 at Shoreline. The #26 Irwin Industrial Tools Roush Fenway Racing team car is scheduled to make an appearance on September 12th at Dunn Lumber's Normandy Park yard.

Bellevue yard to host AZEK® Trim Clinic

Wood products require constant maintenance and still show signs of deterioration. AZEK trimboards are impervious to moisture and insects and will never rot, warp, twist, split or decay. Suitable for below grade and high moisture areas, AZEK materials will withstand the test of time. AZEK trimboards can easily be milled, cut, routed and even heat formed to create curves and arches.

AZEK materials are available in standard trim dimensions as well as in sheets, cornerboards, beadboard and rustic Frontier texture for low maintenance and lasting beauty. AZEK trimboards is the only brand to hold a building code report (ESR-1074). It is used for all non-load bearing exterior trim applications such as soffits, fascia, window and door trim and beadboard ceilings.

Join us on Wednesday, May 9, at 8:30 a.m. to learn more about AZEK materials' uniformity, durability and beauty and to see firsthand their workability. Learn why AZEK products are the number one brand of trim in the building industry and how it can save you and your clients time, labor, waste, callbacks and maintenance.

New for 2007, AZEK trimboards are stocked at some Dunn Lumber locations. For additional information, visit your nearest yard, call 1-877-ASK-AZEK (877-275-2935) or visit www.azek.com. ■

Program

- 30 minute presentation explaining the features and benefits of AZEK products, where and why to use it.
- 15 minute presentation on installation guidelines
- 30 minute break
- 30 minute workability demonstration covering: heat bending; AZEK adhesive; cutting; drilling; routing; fastening; painting; filling nail and screw holes; and cleaning
- 15 - 30 minutes showcase photos, Q&A
