

# SPERO

eco-wise mouldings & boards

contains no urea-formaldehyde  
meets CARB Phase II requirements

100% recycled wood fiber  
harvested from responsibly managed forests

manufactured domestically

Platinum Prime™ premium finish

qualifies for LEED™ credits

Ready to install, professional grade  
MDF mouldings and boards  
and eco-friendly too!

This product will qualify for LEED™ credit as a “Low Emitting Material” under the indoor air quality provision EQ 4.4, for “Recycled Content” under MR 4.1 and 4.2, and when applicable for “Local/Regional Materials” under MR 5.1 and MR 5.2.

# THE ECO-WISE CHOICE

## A GREEN BUILDING-COMPLIANT ALTERNATIVE

**Moulding & Millwork** is proud to be leading the way in providing a low emission Green Building-compliant solution to MDF mouldings and boards.

Utilizing leading edge resin technology that contains no urea-formaldehyde, **SPERO** products are designed to meet or exceed the most stringent environmental emissions in the World including California Air Resources Board (CARB) Phase II requirements (HCHO Emission:  $\leq$  0.05 PPM\*). In addition, **SPERO** products are made from 100% recycled wood fiber (SCS certified) that was originally harvested from responsibly managed forests (SFI certified).

\*ASTM E-1333

## PROFESSIONAL QUALITY YOU CAN EXPECT

**SPERO** products are milled in **Moulding & Millwork's** quality driven MDF manufacturing facilities in both the United States and Canada. With **SPERO** products you can expect exceptional qualities including:

- Platinum Prime™ smooth paint and go finish
- Smooth machined profiles and edges
- Precise tolerance standards

This product will qualify for LEED™ credit as a “Low Emitting Material” under the indoor air quality provision EQ 4.4, for “Recycled Content” under MR 4.1 and 4.2, and when applicable for “Local/Regional Materials” under MR 5.1 and MR 5.2.
